

ACT82001 - Big Data Technical Essentials

We are living in a world increasingly reliant data, and big data is the driving force behind emerging technologies such as artificial intelligence, data science, and the Internet of Things (IoT). However to leverage big data and extract insights from data is still a priority for most companies. To redefine your data strategy, you need to understand how information is organized, analyzed, and interpreted. This Alibaba Cloud specialty course will help you to understand big data and how to prioritize data technologies to drive business value and growth. In this course, we will show you how to use MaxCompute, DataIDE, HybridDB and other related services to build big data applications and solutions.

Audience

Junior Data Developers and Data Beginners
