

## ACT82003 - Alibaba Cloud MaxCompute Deep Dive

MaxCompute (formerly ODPS) provides a fast and fully hosting GB/TB/PB-level data warehouse solution. MaxCompute provides you with a comprehensive data import solution and a variety of classic distributed computing models, enables you to solve your massive data calculation problems more quickly, so as to effectively reduce business costs and protect data security. In this course, we show you how to program on MaxCompute with SQL and Python. We'll also learn the security mechanism of MaxCompute.
